

The most distant galaxies in the universe can be seen by ALMA

PI: Include here the name of the PI

1 Abstract

Include here the abstract of your proposal (optional)

2 Scientific Justification

Enter the scientific justification here, together with any figures and tables that you judge necessary.

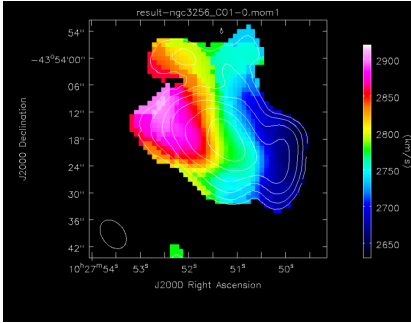

Figure 1: *The CO(1-0) velocity field of NGC 3256, with contours of the total line emission map overlaid (ALMA Science Verification Data).*

Table 1: *Here we show the continuum sensitivity required per band.*

Frequency (GHz)	Sensitivity (mJy)
100	0.01
300	0.10

You can structure the scientific justification using the two subsections below (optional).

2.1 Scientific rationale:

2.2 Immediate objective:

3 Potential for Publicity
